

## CFN KIMYA ENVIRONMENTAL MANAGEMENT POLICY

Being CFN Kimya, we care about people, society, and the world. in line with our Sustainability Policy and values, within this framework, we hereby undertake the followings:

- To manage all our processes in full compliance with national and international environmental legislations, standards and covenants,
- To fully comply with our target of zero environmental and process accidents every year,
- To make projects and investments that will raise the environmental consciousness of all our stakeholders, especially our employees and suppliers,
- To manage our environmental risks from a life cycle perspective with awareness of the effects of climate change, to measure, monitor and take actions to reduce our carbon footprint and greenhouse gas emissions,
- To increase recycling by using natural resources at an optimum level and prevent waste,
- To prefer more environmentally friendly raw materials in our product improvement and new product development processes and to minimize negative impacts on the environment,
- To reuse and recycle wastewater generated as a result of our activities as much as possible,
- To minimize waste and monitor the environmental impact and dimensions of our activities, to provide the necessary resources to take the necessary actions completely and on time,
- To be prepared at all times for potential environmental emergencies,
- To continuously monitor and improve the performance of the Environmental Management System.
